♪ [music] ♪Nursys e-Notify is an innovative nurse notification system developed by NCSBN in collaboration with boards of nursing and is provided as a free service in support of boards of nursing's mission of public protection. Nurses can utilize e-Notify to track their license status. Let's learn just how easy, quick and efficient it is.

NCSBN's Nursys is the only national database for verification of nurse licensure, discipline, and practice privileges for RNs, APRNs, and LPN/VNs from participating boards of nursing. U.S. boards of nursing and its territories push their licensing and discipline data, including board of nursing publicly available alerts to Nursys through frequent, secure updates.

Through a written agreement, participating boards have designated Nursys as their primary source equivalent and authorized Nursys to share publicly available data. E-Notify is the simple, one-stop shop for monitoring the licensure and discipline status of your licenses. The system automatically sends license renewal reminders and board of nursing issued publicly available alerts directly to you as the information is entered into Nursys by boards of nursing.

You'll now learn these vital details as soon as they are reported. Signing up for e-Notify is simple. Enroll yourself in just a few minutes. Start by entering your email address and click on the link in the confirmation email. You can now search for and select your Nursys record to register.

Then, finish your enrollment by completing your e-Notify profile. E-Notify helps you easily manage licenses by automatically adding your new licenses to your account. You'll get email notifications and optional text reminders about license expiration. You'll be contacted via email when the following changes are made to any of your enrolled licenses: active status license status, including disciplinary actions or board of nursing issued publicly available alerts, and license expiration.

The authorization to practice map provides a visual representation of where you can practice as a registered or licensed practical nurse. Both a map and list view are available. The best part of e-Notify is that it is a completely free service. Save time, money, and resources while reducing the overall risk of missing important information from your boards of nursing about your license status.

Register for Nursys e-Notify today at nursys.com.
