NAME ON CARD

Past NCLEX Program Reports are available for purchase. For more information, visit the NCLEX Program Reports website at https://reports.mountainmeasurement.com/nclex/ or call 800.261.6227.

For educational program code information check online at https://reports.mountainmeasurement.com/nclex/faq or call 800.261.6227.

You can supplement your NCLEX Program Reports subscription with a corresponding set of CSV files that will easily load your data into many spreadsheet applications, such as Microsoft® Excel, or data analysis tools, such as SPSS. These CSV files contain the exact same values that are contained in your NCLEX Program Reports subscription. Using these tools, you can easily track your program’s performance longitudinally (over time) or make comparisons between the performance of graduates in two different educational programs within your organization.

MISSING OLD NCLEX® PROGRAM REPORTS?

Here’s your chance to fill in the gaps to your program’s subscription history.

Also available are comprehensive sets of historical CSV files containing your NCLEX Program Reports information from Oct. 1, 2004 – Sept. 30, 2010. These files make it easy to analyze the performance of your program over time.

More information about the CSV files (including a sample download) can be found on the NCLEX Program Reports website at https://reports.mountainmeasurement.com/nclex/about_csv.
The NCLEX® Program Reports are invaluable reports that contain more than 25 different tables and charts that document how the performance of graduates from a particular nursing program compares to the performance of graduates from other programs in the same jurisdiction and nationwide. These reports can be downloaded in an electronic format quickly and easily.

Through the NCLEX Program Reports, you can learn how your program’s graduates ranked overall and in each of the eight areas of the NCLEX Test Plan. In addition, your program’s graduates are ranked along six content dimensions:

• Four (PN) – five (RN) phases of the Nursing Process;
• Eight categories of Human Functioning;
• 10 categories of Health Alterations;
• Four areas of the Wellness/Illness Continuum;
• Six stages of Maturity; and
• Four aspects of Stress, Adaptation and Coping.

Use NCLEX Program Reports for program evaluation, curriculum design, to track your graduate trends or recruit prospective students.

**Subscription Details**

The NCLEX Program Reports are provided as an online subscription service. Three different subscriptions are available: annual, semi-annual, and joint annual and semi-annual. The Annual NCLEX® Program Reports benefit education programs by providing performance feedback of its graduates over an entire year. Optimal programs that graduate at least 10 students in each reporting period should subscribe to both the Annual and Semi-Annual NCLEX® Program Reports to more effectively monitor the performance of students by cohort (fall and spring).

Each report is created using the data from the NCLEX candidates testing during a specific timeframe called the reporting period. The subscription options table at right illustrates the reporting periods associated with recent and upcoming editions of the NCLEX Program Reports.
