Candidate Number: 20091148
Date of Birth: 06/04/1992
Social Security Number: XXX-XXX-XXXX
Program Code: US04201500
Program Name: AMERICAN CAREER COLLEGE
A LOS ANGELES,CA

Roland Orzabel, an NCLEX examination applicant for California Board of Vocational Nursing & Psych Tech, **HAS NOT PASSED** the National Council Licensure Examination for Practical Nurses.

The NCLEX-PN® examination is a Computerized Adaptive Test (CAT) that administers test items until a precise pass or fail decision can be made. On the NCLEX-PN examination, no candidate is administered fewer than 85 items or more than 205 items. You answered **85** items. Only candidates whose performance was close to the passing standard, either just above it or just below it, had to answer the maximum number of 205 items. Fewer items were required for a precise pass-fail decision to be made for those candidates whose performance was much lower than the passing standard.

Pass-fail decisions are based upon the candidate's performance across the entire examination. To pass the NCLEX® examination, a candidate must perform **ABOVE** the passing standard. Candidates fail if they only meet the passing standard or are below it. The purpose of this Candidate Performance Report is to give you information about your performance on **03/28/17**. The back of this form gives you more information about your performance on the specific content areas of the examination.

For each content area of the examination, you will find the percentage of the test represented by that content area, a statement of your performance (your ability in that content area), and description of the content area with a list of topics related to it. Your performance in each content area is described in one of the following ways:

- *Above the passing standard*
- *Near the passing standard*
- *Below the Passing Standard*

These descriptions are designed to help you understand the strengths and weaknesses of your performance. Use this information to help guide your study before you take this test again. Please note that "near the passing standard" does not imply a satisfactory performance on the content area. Also, you cannot add your performance in the content areas (i.e. above, near, or below the passing standard) to validate the pass-fail decision. **If your ability is above the passing standard in a given content area, you should still study that area to maintain your proficiency.**
