

International Guiding Principles for Telehealth Nursing

Brendan Martin, PhD

PHASE 1:

Exploratory study to identify Telehealth Companies

PHASE 2:

A multi-phase mixed methods study to learn more about telehealth nursing services and regulatory requirements

PHASE 3:

International Telehealth Think Tank

PHASE 4:

Validation

Methodology

1. Document Analysis
 - Job advertisements
 - Website content
2. Company Survey
 - Direct outreach
 - LinkedIn's Premium Direct Mail

International Telehealth Think Tank

- Six countries, 6 Canadian Provinces, 17 states
- Two small group discussions:
 - Develop the guiding principles
 - Further refine the principles
- Ten Guiding Principles emerged from these discussions

Validation

- The guiding principles were set to the entire international listserv for their approval and comments.
- A total of 27 participants responded to the survey representing five countries.
- The results were approved by more than a two thirds majority of the respondents.

Next steps

- Disseminate findings/Work with regulators
- Build upon these preliminary efforts to begin discussion and collaboration among all interested stakeholders.
