Foundations of Regulation

Coming Soon in October 2026

Learning journey

Learning journey description

The *Foundations of Regulation* Learning Journey introduces the core concepts, structures, and processes that support nursing regulation and public protection. Across seven connected courses, learners build a shared understanding of regulatory purpose, authority, governance, operations, decision-making, and the key resources that support their work.

Designed for all regulators, regardless of role, jurisdiction, or experience level, this learning journey establishes a common foundation for regulatory practice while reinforcing the shared mission of protecting the public through safe, competent

Created in: English

Part of the learning journey:

Foundations of Regulation

ADD TO PLAYLIST

MARK AS OUTDATED

Course description

Every license issued, complaint reviewed, policy interpreted, and regulatory decision made serves a shared purpose: protecting the public. In this course, you'll consider how public protection, patient safety, and professional accountability shape nursing regulation and guide regulatory decision-making. You'll trace the evolution of nursing regulation, the role of nursing regulatory bodies and NCSBN, and how regulatory functions work together to support safe, competent, and accountable nursing practice. By the end of the course, you'll have a deeper understanding of how nursing regulation protects the public and how your role contributes to that mission.
