NCSBN Awards Committee

**2026 Regulatory Achievement Award** The Mississippi Board of Nursing has steadfastly taken an active role in shaping nursing regulation beyond its own jurisdiction. Over the last five years, the Board invested \$7.5 million in scholarships and hardship assistance, removing barriers for thousands of potential nurses.

The Mississippi Board has also enhanced public protection through communication, outreach, and modernization. Coming out of the pandemic, the Board's leadership developed a model that helped establish enduring standards for safety, collaboration, and continuity of essential services.

Because of the Board's innovative solutions to regulatory challenges, its staff are frequently consulted by peers and asked to participate in collaborative projects, serve on NCSBN committees, and present at NCSBN conferences. For these reasons and more, we are pleased to present the 2026 Regulatory Achievement Award to the Mississippi Board of Nursing.
