NCSBN Awards Committee

2025 Regulatory Achievement Award. The College of Registered Nurses of Alberta demonstrates a dedication to serving the public interest by improving and innovating licensing policies and processes, thus ensuring ethical, safe, and competent care by their registrants. The College implemented a national regulatory framework that prepares nurse practitioners to provide care throughout a patient's lifespan, across practice settings.

Their leadership not only guides effective public policy for nursing in Alberta, but also influences public policy for all health professions. Their active involvement in NCSBN activities has been both impactful and inspiring. Members of the College have served on committees, attended meetings, and authored articles for NCSBN publications, including the "Journal of Nursing Regulation."

For making significant and lasting contributions to nursing regulation and advancing NCSBN's mission, the College of Registered Nurses of Alberta is honored with the 2025 Regulatory Achievement Award. 🎵
